

RMG Consulting

Best Practice

Recent trends have created a need for improved methods to handle workers compensation and casualty claims cost effectively.

RMG Consulting can get your claims workflow on the right track with:

- Loss portfolio evaluation
- Inter/intra company communication
- Leakage assessment
- Electronic benchmarking
- Scorecard measurement
- Vendor management
- Cost extrication
- Reserving and settlement protocol
- Claim data management
- Review of operational units
- Assessment and oversight
- Expense control

Turning Data Into Action

RMG Consulting has developed and copyrighted an auditing and benchmarking process to statistically review each component of the claims handling process, and individually benchmarks each process.

This process combined with our claims auditing and operational experience allows us to design an extremely effective measurement program that will reduce costs and recover loss funds.

To maximize audit results, an auditor should be aware of the most significant areas for improvements before the claim files are selected for audit. This results in maximizing savings and minimizing expenses.
