## Claims Management

RMG Consulting, since its inception in 1999, specialized in Claims Auditing, Workflow Analysis and management services. Our staff consists of proven professionals with diverse and varied backgrounds having at least twenty years of "hands on" claim and management experience in the insurance, reinsurance, excess and surplus lines and reinsurance arenas (see Principals and Consultants).

We are extremely focused and utilize a combination of systems, technical, auditing, and organizational development skills to target areas for improvement and bottom line results. Our recommendations are based upon industry Best Practices.

RMG has unique competency in each of the following claim areas:

- General Liability
- Non Standard Automobile/Transportation
- Professional liability
- Property
- Workers' Compensation

Other Specialty Areas - Our staff is capable of all facets of the claim handling cycle from pre-quote audits before business is written to the culmination of how a particular claim, program or book of business is concluded. We have the ability to assess early warning signs to predict how a program or a book of business will develop and recommend whether to continue to write or discontinue particular risks. We accomplish the above through a combination of technical expertise, data mining and analysis as well as systems knowledge. We know how to link claim management, escrow loss funding, and the direction of a partner and are exhibited in several niche segments. Also refer to Complex Claim Oversight.
